Roland Cloutier : Becoming a Global Chief Security Executive Officer: A How to Guide for Next Generation Security Leaders before purchasing it in order to gage whether or not it would be worth my time, and all praised *Becoming a Global Chief Security Executive Officer: A How to Guide for Next Generation Security Leaders*:

4 of 4 people found the following review helpful. Roland applies best practices throughout this book by offering up realistic options ...By LazRoland Cloutier's publication outlines a very pragmatic approach in building, supporting, and

enhancing an Information Security program, which can be applied during any stage of a company's business lifecycle. Whether you're a Board Member, Executive, established CISO/CSO, IT support engineer, or Developer, you will find value in the pages of this book. Roland applies best practices throughout this book by offering up realistic options and examples for practitioners to leverage in their workplace. Roland's real world experiences are evident throughout the book because he provides thought provoking ways to address:

1. Understanding and aligning to the company's business drivers - the material in this book can be applied to any vertical or industry;
2. Being creative in gaining input and support from multiple stakeholders at any level within the organization;
3. Building and maintaining accountability with InfoSec throughout the entire organization by using terminology that will be embraced by multiple stakeholders regardless of title or team (eg. Executives, Board Members, Directors, Human Resources (HR), Legal, IT, Project Managers (PMO), and Engineers);
4. Building programs that are actionable, able to scale up/down, and reach operational efficiencies quickly; and
5. Future considerations such as using innovation and understanding emerging technology that may better align/support the company and business processes.

Taking a recommendation right from one of Roland's strategies, I've purchased a couple extra copies as gifts for some reading over the holidays. A final thought - I'm confident the coaching and insight provided in this book would have saved me a lot of time and resources earlier in my InfoSec career. I'm also confident that the material in this book will assist me as I build out future InfoSec programs.

Although the book is a guide for a global company, there are an incredible number of useful ideas and methods that a CSO/CISO or someone who wants to be a CSO/CISO/Privacy Officer would find well worth examining. This is NOT a technical book - this is definitely for the executive level.

0 of 0 people found the following review helpful. Very well done.

Great book. Covers such a breadth of material, but doesn't skimp on details.

Becoming a Global Chief Security Executive Officer provides tangible, proven, and practical approaches to optimizing the security leader's ability to lead both today's, and tomorrow's, multidisciplined security, risk, and privacy function. The need for well-trained and effective executives who focus on business security, risk, and privacy has exponentially increased as the critical underpinnings of today's businesses rely more and more on their ability to ensure the effective operation and availability of business processes and technology. Cyberattacks, e-crime, intellectual property theft, and operating globally requires sustainable security programs and operations led by executives who cannot only adapt to today's requirements, but also focus on the future. The book provides foundational and practical methods for creating teams, organizations, services, and operations for today's and tomorrow's physical and information converged security program, also teaching the principles for alignment to the business, risk management and mitigation strategies, and how to create momentum in business operations protection. Demonstrates how to develop a security program's business mission

Provides practical approaches to organizational design for immediate business impact utilizing the converged security model

Offers insights into what a business, and its board, want, need, and expect from their security executives
