This book separates itself from the many options that you can find at the bookstore under the leadership section. Its uniqueness makes it worth buying. The book contains a collection of 20 stories from chief executive officers that have led very

important global companies: Orit Gadiesh from Bain, Krisrsquo; Gopalakrishnan from Infosys and Paul Bulcke from Nestleacute;, among others. Throughout the book, Peter Vanham applies interesting filters to extract exclusive perspectives from these notable lives: adversity, serendipity, Isquo;breaking free from tiesrsquo;, role modelling. Being an expatriate himself, the author uses his voice to raise questions that appeal to those that share his own experience of working abroad. And his answers are encouraging for this audience as he highlights the still worthy pursuit of the American dream, the strong work ethic of the immigrant workforce and the deep need to expose ourselves to multiple cultures as key traits for those that desire to reach the top of today's organizations. Strangely, he argues that reaching these top positions in the future shouldnrst; trump the joy of loving what you do, doing it well and gaining the trust of those around you. Being happy and reaching a balanced life are also important in his view. As he demonstrates in his recollection of these profiles that the story of your country of birth may also be your own, he also uses the examples of these global leaders to encourage ambitious individuals in their professional journeys, all this without norming behaviors or repeating clichacute;s that are too often found in self-help books. This is an enjoyable reading, promoting reflection on your own learned lessons for life and recognizing the untamable forces of chance and time over our paths.0 of 0 people found the following review helpful.
