This anthology of interdisciplinary writings looks at the integration of mind, body, and spirit as it plays out in the workplace—whether in birth coaching, teaching parents, assisting the terminally ill, or working in the military, the classroom, or the corporation. These essays reveal what gets in the way of our humanity in the work world and how to rediscover that humanity. Written by leading professionals in business, education, medicine, technology, finance, psychology, and the military, this collection of essays explores how reconnecting with one's humanity can result in true leadership in any field. From the Trade Paperback edition.
