B. Espen Eckbo : Bidding Strategies, Financing and Control: Modern Empirical Developments: 2 (Corporate Takeovers) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Bidding Strategies, Financing and Control: Modern Empirical Developments: 2 (Corporate Takeovers):

A selection of republished corporate finance articles and book chapters that can serve as an advanced corporate finance supplementary text for courses that use no textbooks. Combining convenience and an affordable price with retypeset pages and a high-quality index, the 600 pages of volume two, "Bidding Strategies, Financing, and Corporate Control", focus on a range of special topics, ranging from theories and evidence on strategic bidding behavior (offer premiums, toeholds, bidder competition, winners' curse adjustments, and managerial overconfidence), issues arising when bidding for targets in bankruptcy auctions, effects of deal protection devices (termination agreements, poison pills), role of large shareholder voting in promoting takeover gains, deal financing issues (such as raising the cash used to pay for the target), managerial incentive effects of takeovers, governance spillovers from cross-border mergers, and returns to merger arbitrage. Including an index and new introduction, this volume will simplify and facilitate students' interaction with new concepts and applications. Provides a status report about modern scientific evidence on corporate takeovers. Exposes students to new methods and empirical evidence while reading high quality primary material. Offers a concise and cost-efficient package of journal and book articles for advanced corporate finance students.

From the Back Cover This selection of republished corporate finance articles and book chapters can serve as an advanced corporate finance textbook. Combining convenience with retypeset pages and a high-quality index, this volume and its companion, "Takeover Activity, Valuation Estimates, and Sources of Mergers Gains," introduce students to modern scientific evidence about corporate takeovers. Its contents include classical issues such as the existence and source of merger waves, empirical estimates of takeover announcement returns and the division of takeover gains between bidders and targets, and tests for potential sources of takeover gains (primarily involving estimation of industry wealth effects of takeovers). Featuring a new introduction, this volume will simplify and facilitate students' interaction with new concepts and applications. About the Author Professor B. Espen Eckbo holds the Tuck Centennial Chair in Finance. He is also Faculty Director of Tuck's Lindenauer Center for Corporate Governance, which he founded in 1999. He teaches advanced MBA courses in the areas of corporate finance, corporate takeovers and international corporate governance. Professor Eckbo, who received a PhD in financial economics from the University of Rochester in 1981, has published extensively in the top finance journals in the areas of corporate finance, investment banking, and the market for corporate control. He is a recipient of an honorary doctoral degree from the Norwegian School of Economics, the prestigious Batterymarch Fellowship, as well as several outstanding-paper awards. He is a research Associate of the European Corporate Governance Institute (ECGI), and a frequent keynote and invited seminar speaker. He was called in 2009 by the U.S. Congress to testify on issues concerning the government's large equity ownership positions in companies rescued under the Troubled Asset Relief Program (TARP).
