That point being that using Elliot wave theory, certain techniques from Gann and Andrews Pitchfork and some others are vastly superior to using lagging indicators like MACD. And also that these techniques should be used with a grain of salt with far more attention paid to patterns you see in markets due to practice and experience overlaid onto technical analysis. Advanced traders will be fascinated and have their skillset expanded and probably sign up for Greenblatts course. I probably will.1 of 1 people found the following review helpful.
