Using his wide-ranging experience as a business operator and investment analyst, John Ryder (co-founder of Ryman Healthcare) shows you how to read and understand business and economic cycles across a diverse range of global markets and explains practical techniques to protect and grow your investments. He takes lessons learnt from the GFC

and intersperses them with analysis on how equity markets work, when to invest, and an analysis of the psychological makeup of many investors (and why this makes them instinctively invest the wrong way). He also outlines techniques to invest and profit from share markets, currencies, commodities, real estate and private equity worldwide, and looks at the practices of some of the world's best-ever inspirational traders, investors and entrepreneurs and how they made their fortunes. Using his many years of experience, John Ryder has also created 23 of his most valuable trading strategies and tools to help you to invest in the global marketplace.
