**From Routledge : Global Japanization?: The Transnational Transformation of the Labour Process (Routledge Library Editions: Japan)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Global Japanization?: The Transnational Transformation of the Labour Process (Routledge Library Editions: Japan):

Global Japanization? Brings together research from North America, Japan, Europe and Latin America to analyse the influence of Japanese manufacturing investment and Japanese working practices across the global economy. The

editors present original case studies of work reorganization and workers' experiences within both Japanese companies and those of their competitors in diverse sectors and national settings. These studies provide a wide-ranging critique of conventional accounts of Japanese models of management and production, and their implications for employees. They offer new evidence and fresh perspectives on the role of "transplants" in disseminating manufacturing innovations, and on the responses of non-Japanese firm in reorganizing production operations and industrial relations.
