**From Routledge : Globalising Food: Agrarian Questions and Global Restructuring** before purchasing it in order to gage whether or not it would be worth my time, and all praised Globalising Food: Agrarian Questions and Global Restructuring:

In an increasingly global world, societies are being provisioned from a bewildering array of sources as new countries and new food commodities are drawn into international markets. Globalising Food provides an innovative contribution to the area of political economy of agriculture, food and consumption through a revealing investigation of the globalisation and restructuring of localised agricultural sectors and food systems. The book draws on new theoretical perspectives and wide-ranging case studies from Britain, the USA, India, South Africa, New Zealand and Latin America. The key themes addresses range from giant multinational food corporations, rural industrialisation and World Bank policies, to the regulation of pollution, labour relations, urban food politics and environmental sustainability. Globalising Food offers important insights into the problems, consequences and limits of the industrialisation of agriculture and the provisioning of food in a global world as we approach the new millenium.

'Globalising Food is a significant contribution to a new radical critique of globalization.' - Tim Lang, Times Higher Education Supplement  
'This book is an important and valuable contribution to the study of food and agriculture.' - Environment and Planning  
'Presenting rich empirical accounts of so many geographic regions and extending theoretical debate ... this is a wonderful edited collection which will undoubtedly prove invaluable to researchers working in the areas of critical geography, political economy and international development.' - Economic Geography Research Group  
About the Author  
David Goodman is Professor and Chair, Department of Environmental Studies, University of California, Santa Cruz. He is co-author of *Refashioning Nature: Food, Culture and Ecology* (Routledge 1991) and *From Farming to Biotechnology*. Michael J. Watts is Professor and Director of the Institute of International Studies, University of California, Berkeley. His most recent co-authored books are *Liberation Ecologies* (Routledge 1996), and *Reworking Modernity*.
