Juan Martin, Jose Antonio Ocampo : Globalization and Development (Latin American Development Forum) before purchasing it in order to gage whether or not it would be worth my time, and all praised Globalization and Development (Latin American Development Forum):

0 of 0 people found the following review helpful. improved financial and goods mobilityBy W BoudvilleFrom the vantage of Latin America, the results of decades of globalisation on the economic development of the region's countries are studied. We see that in recent years, there has been a marked increase in financial and goods mobility.

Most countries now allow and often indeed encourage foreign direct investment. The more the better is a common view of governments. Which differs markedly from some earlier policies that sought to isolate a nation's currency dealings. The increased goods mobility is also another aspect. Often involving the export of commodities to developed nations. In marked distinction is the still limited labour mobility. The developed nations have proved far more reluctant in the granting of temporary migrations from Latin America. The role of the WTO in supporting and expanding globalisation is given. Often, this involves pushing for the reduction of tariff barriers. But also for the equal treatment of imports where these are goods also made by domestic companies.

Award winning title! 'Globalization and Development' was selected as a 2003 'Notable Government Document' by the American Librarian Association (ALA) and GODORT (Government Documents Round Table). In this book, the UNECLAC (United Nations Economic Commission for Latin America and the Caribbean) draws upon the Latin American and Caribbean region's experience in order to formulate a historical and multidimensional assessment of the globalization process from the perspectives of developing countries.

“...this volume is one of the most useful and incisive texts currently available on Latin America and the global economy, offering an analysis that stands up to and advances the high standards set by ECLAC over the last 50 years.” International Affairs From the Inside Flap Globalization and Development draws upon the experiences of the Latin American and Caribbean region to provide a multidimensional assessment of the globalization process from the perspective of developing countries. Based on a study by the United Nations Economic Commission for Latin America and the Caribbean (ECLAC), this book gives a historical overview of economic development in the region and presents both an economic and noneconomic agenda that addresses disparity, respects diversity, and fosters complementarity among regional, national, and international institutions.
