Pawel, Dr Bozyk : Globalization and the Transformation of Foreign Economic Policy (Transition and Development) before purchasing it in order to gage whether or not it would be worth my time, and all praised Globalization and the Transformation of Foreign Economic Policy (Transition and Development):

The onslaught of globalization has brought with it sweeping changes to the foreign economic policy of the last 50 years. As the international political economy of nations and regions continues to be drawn and redrawn, this book traces the goals and instruments of foreign economic policy during this period, providing insight into the long-run trends and developing new theoretical generalizations. The book charts the journey from the point when foreign economic policy was solely concerned with foreign trade - pursued to promote the interests of individual countries - to the current globalization of the world economy that creates a uniform market in goods, services and factors of production that embrace all countries and regions.

About the Author Dr Pawel Bozyk is Professor of Economics in the University of Economics and Computer Science in Warsaw, Poland. Pawel is also a Lecturer in the Warsaw School of Economics, Poland and Lecturer in the University of Commerce and Law in Warsaw, Poland.
