Excellent leadership principles and stories By Henry Kraebber This is an excellent book that will be added to the reading lists in my classes in the College of Technology at Purdue University. The book is a great blend of principles and their applications, told through stories and many links to the

USA Miracle on Ice team of the 1980 Olympics. I read it this summer while on vacation near Lake Placid and had the opportunity to visit the rink where it happened. This is a fun read that will make you think. It addresses important leadership skills that technical leaders, such as my students, need to master. 0 of 0 people found the following review helpful. Business lessons from one of the greatest Olympic teams of all time It's been called the greatest upset of all time, the most memorable Olympic moment ever, the "Miracle on Ice." No matter which superlative is used, no one can deny that the U.S. men's hockey team's defeat of the Soviet Union in the medal round of the Lake Placid Olympic Games was a defining moment for Cold War America. The U.S. team's goalie was a Boston University student named Jim Craig, who is now a leadership expert and keynote speaker to business audiences. Gold Medal Strategies gives you Craig's unique lessons from the "Miracle" team on team dynamics, leadership, motivation, and other important management topics. With his unparalleled perspective, Craig dissects and analyzes the elements of a successful team, how to assemble one, and what philosophies will keep the team's shared goal a reality. This book outlines the necessary skills and details the specific techniques you need to maximize your business readiness, hone competitive cooperation, gather your strategies, and attack your challengers.
