how others have successfully navigated life and their careers. I was pleased to get the opportunity to read an advanced

copy of *Got What It Takes?: Successful People Reveal How They Made It to the Top* by Bill Boggs. While you still have to filter their words and experiences through your own reality, it's a great read for those who are into personal improvement. Boggs got the opportunity to interview a large number of well-known and successful people in various industries. There were some names I didn't recognize, but a large number were household names... Maria Bartiromo, Sir Richard Branson, Jim Cramer, Mario Cuomo, Christie Hefner, Matt Lauer, and Norman Lear, to name just a few. The interviews appeared to be very conversational, and the personalities of the different people shine through very well. Boggs took a somewhat different approach than most books of this sort, however. Instead of taking the "person per chapter" route, he divides the book into success components, like working hard, confronting insecurity, and keeping your life in balance. Then for that particular subject matter, he'll pull in the pieces of the interviews that corresponded to that. Seeing how people like Cramer, Anna Quindlen, and Bill Bratton all deal with stress in one consolidated chapter helps you put it all together. Boggs also adds a few "calls to action" on many of the paragraphs, so you don't get to read it all and walk away with no clue as to what to do to put it into your own life. There is the danger in a book like this to view the people as "perfect", individuals who are hyper-focused and who never make missteps. That's definitely not the case, and there are a few foibles in the different chapters. I think this book works best when you see the underlying principles of importance, paying a bit less attention to the person behind them. There's a wealth of wisdom and examples here, and it's an entertaining read. It's definitely worth reading to see where you need to notch up your performance...

Life is too short for anything less. Bill Boggs' *Got What It Takes?: Successful People Reveal How They Made It to the Top* makes it onto my list of such best books. It's easy and fun to read, and you end up learning many wonderful life lessons and acquiring priceless nuggets of wisdom from people who've reached the top of the ladder in their professions. These are hard-won insights we're talking about, easily yours for the taking. What I also like about this book is that the author includes himself as one of the subjects, satisfying your natural curiosity to know more about the person taking you on this literary journey. One of the side benefits is you become acquainted on an intimate, human level with celebrity types normally out of reach. You share in their private thoughts and learn of their ups and downs -- that, in fact, they're on the same journey as everyone else. I was especially impressed by the detailed "roadmap" to success spelled out in the book, as delineated by the chapter headings. If you've never had a wise parent or relative, or mentor, help you in your life, this book is the next best thing. And it's a work you can return to again and again. I recommend it.

The book is a collection of lessons learned from interviewing over forty extraordinary people. Sir Richard Branson, Renee Zellweger, Mario Cuomo, Clive Davis, Donald Trump and Diane von Furstenberg are just some of the wide variety of people interviewed. Boggs, in his inimitably warm and down-to-earth way, collects insights into life and success that are personal, inspiring, and universal. As if that weren't enough, the important ideas are highlighted in bold print for easy reference and review. A wonderful touch! *'Got What it Takes?'* is the *'Think and Grow Rich'* for the 21st century - I highly recommend it!
