This book covers a lot of ground concerning direction in such a vast field. It opens options outside of teaching and field work, as well as helping you improve your part in the applying/hiring process. As a graduate of an Anthropology program myself, I found little help in finding

what I wanted to do with my education and how to do it. This book answered many of those questions and gave me some direction in the use of my education. Although it would've been more helpfull when I was in college, it still helped me tremendously as a graduate. I highly recommend this book for those in Anthropology.0 of 0 people found the following review helpful. Also provides good information about where and when to start the job ...By ShyannVery insightful for anyone on the fence about majoring. Also provides good information about where and when to start the job hunt for those already invested in anthropology.12 of 13 people found the following review helpful. Somewhat helpfulBy Jess Tudor ElliottThis book, while offering good advice for career paths in general, is not very useful for the Anthropology student. As a graduate of Anthropology I have been working for the last year in a job completely unrelated to my major. I am constantly searching for work and even internships or volunteer opportunities in Anthropology. Because I am having trouble finding work like this, I decided to buy this book. The only resources that they mentioned are things that I have already tried (such as the AAA website). While this book is good for most careers, it is not specific enough to help anyone in Anthropology when looking for a job in the field.

Great Jobs for Anthropology Majors is a big help to students entering the working world. They discover common career paths of graduates in their field, get help assessing their individual talents and skills, and learn what steps need to be taken to land a job. Every aspect of identifying and getting started in a career is covered, from exploring options and making a smooth transition from college to career to conducting an effective job search.
