**Yanqing Jiang : Green Development in China: Models and Discussions (SpringerBriefs in Economics)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Green Development in China: Models and Discussions (SpringerBriefs in Economics):

This book focuses on the key determinants of China's sustainable development in the general context of

globalization from an environmental perspective. The author presents expert analysis on China's role in the world economy, trade openness, cross-border investments and sustainable development in China. Readers will gain an in-depth understanding of various important issues concerning China's current and future environmentally sustainable development in this new era of globalization.

**From the Back Cover** This book focuses on the key determinants of China's sustainable development in the general context of globalization from an environmental perspective. The author presents expert analysis on China's role in the world economy, trade openness, cross-border investments and sustainable development in China. Readers will gain an in-depth understanding of various important issues concerning China's current and future environmentally sustainable development in this new era of globalization.

**About the Author** Yanqing Jiang is Professor of Economics at the School of Economics and Finance, Shanghai International Studies University. His research focuses on China's opening up, growth and development. His recent publications (2010-2015) in this area include 38 published journal articles and 4 published books.
