 By tjn7 This book is bursting with ideas, tied together brilliantly. The authors are not content to lay out the past, present and future of crowdfunding, including the architecture of platforms to support it, They also busily being iconoclasts, breaking down rigid "incumbent" attitudes, technologies and practices, and identifying the flaws and frauds that the old world of technology and finance contain and encourage. This is also a book of "futurism", predicting near- and even long-term innovations and change. I highly recommend this to technologists of all sorts... this is how your next successful venture will be run and funded, and the brave new world may be better than the "Dilbert" world we are leaving behind. Forget "execute, execute, execute"... now it is "pivot, pivot, pivot". Thank you, Kevin and Dan.

 By Customer This nicely researched book provides a good analysis into the next generation of funding and startups that uses the connections through social media to raise funds and reach customers. It covers the limits of current VC system - especially the inefficiency of VC's meeting and reviewing all the entrepreneurs. Through crowdfunding, the entrepreneurs build an interested community and customer base and develop symbiotically with their businesses. The newer economic model supports a full scale of potential new businesses from very small to larger than any existing today. I especially liked Ch. 7 "The Artful Ask" and Chs. 13-14 about regulation. These chapters thoughtfully address a lot of the nagging doubts that build as you read through the book about personal transfer of money between un-official, un-incorporated groups. Yeah, corporations have their downsides, but they are tangible and can be held accountable in today's legal system - how do I know these homegrown entities will be enduring and/or accountable? These chapters address the built-in accountability that is developed while the community of funders/customers is developed. They also tell you how to get started if you genuinely want to build your own business. A good read or instruction manual.
