Quentin Wodon, KATHRYN LOMAS : The Economics of Faith-Based Service Delivery: Education and Health in Sub-Saharan Africa (Perspectives from Social Economics) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Economics of Faith-Based Service Delivery: Education and Health in

Sub-Saharan Africa (Perspectives from Social Economics):

The Economics of Faith-Based Service Delivery provides the first ever comprehensive empirical assessment of the role that faith-inspired institutions (FIIs) play in the supply of health care and education services in sub-Saharan Africa. Wodon focuses on estimating the market share, reach to the poor, and cost for households that rely on FIIs as opposed to public and private secular providers of education and health care services. He also analyzes the causes of user reliance on FIIs, the comparative performance of FIIs, and the level of satisfaction among those that use their services. The Economics of Faith-Based Service Delivery is an innovative combination of previously untapped nationally representative household surveys, qualitative fieldwork, and insights from the fields of religious studies and social economics.

About the Author Quentin Wodon is an Adviser and Coordinator in the Education Global Practice at the World Bank.
