Greg N. Gregoriou, Christian Hoppe : The Handbook of Credit Portfolio Management (McGraw-Hill Finance Investing) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Handbook of Credit Portfolio Management (McGraw-Hill Finance Investing):

1 of 1 people found the following review helpful. Some breadth, but no depth!!!By AkGThe only reason I ordered this

book online was the keyword "Handbook". It tries several of the credit portfolio management topics but certainly lacks the rigour and depth to be called as a handbook. It neither has any practical or implementation focus nor has any academic rigour to it. It's just a mere collection of several articles around CPM and allied topics. Don't buy if you are a practitioner looking for actual implementation ideas!

Features expertise from an international team of 35 contributors, including Moorad Choudhry, Panikos Teklos, and Tamar Frankel Provides much-needed, timely information for institutional investors and professional portfolio, asset, and hedge fund managers as the fallout from the credit bubble continues to plague the institutional finance sector Includes important discussion of new risk management techniques and standards, including Basel II
