the Soviet Union and Eastern Europe: Transmission and Response (Pergamon policy studies on international politics):

The Impact of International Economic Disturbances on the Soviet Union and Eastern Europe: Transmission and Response focuses on the transmission of economic disturbances to the Soviet Union and Eastern Europe, as well as the policy responses of both to such disturbances. Topics covered include external inflation, balance of trade, and resource allocation, along with the impact of the world economic crisis on intra-CMEA trade. This book is comprised of 16 chapters and begins with an overview of major international economic disturbances during the first half of the 1970s and their transmission to the Soviet Union and Eastern European countries. The following chapters examine the adjustment made by East European economies to external disturbances; external inflation, balance of trade, and resource allocation in small centrally planned economies; whether the Soviet Union was affected by the international economic disturbances of the 1970s; and the relationship between foreign trade and the Soviet economy. The transmission of international disturbances to Yugoslavia, Hungary, and Poland and the responses of each country are also discussed. The final chapter assesses how the energy crisis and Western "stagflation" have affected the nature of Soviet-East European political relations in the years 1956-1973. This monograph will be of interest to economists and economic policymakers.
