From T.M.C. Asser Press : The Implementation of the EU Services Directive: Transposition, Problems and Strategies before purchasing it in order to gage whether or not it would be worth my time, and all praised The Implementation of the EU Services Directive: Transposition, Problems and Strategies:

The Services Directive is one of the cornerstones for the realization of the EU internal market and is fundamental to economic and legal experts, as well as to the general public. This book analyses in detail the different steps taken by each of the 27 EU Member States in the implementation process of the Services Directive. It provides not only detailed information about the changes in national law adopted by the Member States, but also facilitates a comparison of the different implementation strategies. It gives an insight in the heterogeneity or homogeneity of implementation concepts and shows how European legislation affects legislation that were originally nationally dominated, such as the law of national administration. Valuable for academics interested in European and administrative law and the transposition of European lawmaking into domestic law, as well as for civil servants in ministries, chambers of commerce, local governments and other comparable institutions having to implement the Directive.
