When i purchased the book i was hoping to gain more insight and learn more of the less obvious stuff but instead all that is in this eBook is a bunch of testimonials which wasn't what i was expecting. it lacked depth and i found it very pointless. it wasn't all bad

though as it had a few interesting stories but all in all this is a very shallow book0 of 0 people found the following review helpful. Five StarsBy Gorki MarceloA good motivational read.

Millennial entrepreneurs are redefining work. Increasingly, young people say they want to get out of corporate America, become their own boss and pursue careers more fulfilling than a traditional 9 to 5. From emerging industries, to freelancing, to new spins on existing ideas, this collection of stories will fascinate and inspire you. Perhaps you can relate to Rajat Bhageria who is juggling college and a business venture, or to Falon Fatemi who felt she had plateaued at Google, or to Caroline Beaton whose career just wasn't really taking off. These three and other young people share what it takes and what hurdles lie on the journey to the new American dream.
