source for young women who have the drive and the talent -- but not necessarily the requisite resources -- to pursue success in the business world. Although it's been a while since I could be considered a member of the "next" generation, I found Rezvani's text to be an insightful guide for thoughtful reflection and decision-making at any stage, in practically any field. As an added bonus, I recently had the opportunity to meet Selena at a book talk in New York City, and she is as grounded, knowledgeable and accessible as the book she has written. I recommend that you read the book ... and try to meet this accomplished and generous young author if you get the chance!

Amidst no shortage of business resources, Rezvani's work provides definitively valuable (and actionable) guidance to her readers.. While I am not her primary intended audience (a male) I find myself regularly referring back to her advice and stories--ultimately a playbook for success. Rezvani's direct line access to these remarkable women affords a powerful (and credible) advice resource pool of tangible guidance to help shape one's approach. I have shared this book with colleagues and friends alike--each has told me that the work has changed their perspective and frame of reference.
